Subject: Chipotle Lunch & Learn: Ocean Acidification threatens 50% of World Oxygen Supply
Attachments: Captain PLaneT speaking on Stage at PHX Climate March April 2017.jpg

Greetings Good and Honorable Sir and Folks,

Major Andrew Lane in the Army Reserve just Graduated from Arizona State University with a Master's of Sustainability. I came down in my Army Dress Blues at the last APS Rate Case Hearing and spoke to you all on promoting Solar. I keep hearing that you all are going to vote to support APS' desire to quash Net Metering. I would love to come visit you all and explain Climate as well as Chemical Reality to you you all and I can even bring Chipotle for up to 30 people with all the fixings that you all can enjoy while I talk and present.

I have devoted my adult life to trying to teach the humans to take care of the Earth...so the Earth will take care of all the Humans.

I Pledged to the Sierra Club a few months ago that I would appear in my Army Dress Blues to talk about Science Fact concerning Climate Change etc. I made it to the Phoenix Climate March to speak just a few weeks ago as well, photo attached.

Constantly trying to understand how the fossil fuel fan clubs are so capable of lying and denying it hit me yesterday that:

Today on YouTube it is easy to find a teenager or younger prove in a Junior High Lab how how greenhouse gases like CO2 insulate heat. In fact even 5th Grader Emily Short demonstrates it all quite clearly in her kitchen.

<https://www.youtube.com/watch?v=n3BK6ZsrgHs>

You can see me in Action at of AZ Senator Jeff Flake's recent Mesa, AZ Town Hall with the entire Town Hall on Video on ABC15's Facebook Page. My tag team Question with another Environmental Activist with direct inter action with the 5 Foot Chicken starts 1:34 and I come in on another US Military Spending Question at 2:06 to talk about the Military's Mega Solar!

Are you still contributing to the 110 BILLION TONS of Green House Gases we add to the Earth's Atmosphere each and every day? This American has slashed his carbon footprint as well as that of his Family of 4. Ask me how doing so saves Money, Cleans the Air and Water all while creating Millions and Millions of much Safer Jobs!

Sustainably Yours,

Andrew Lane
